

THE GCP REVENUE HORIZON — COLORADO

Monthly Revenue Focus | Unclaimed Property Identification

Why This Matters Right Now

Colorado finance teams operate in environments where fund classification, enterprise transparency, and documentation clarity matter year-round. First Quarter of the Year identification efforts help agencies understand what may exist before audit preparation and refund-related analysis begin. This process also gives insight into valuable internal control practices and policies.

This is a visibility exercise — not a commitment to recovery.

What Finance Directors Are Seeing

- Potential unclaimed property tied to utilities and enterprise operations
- Legacy balances associated with annexation or service-area changes
- Prior searches limited to a single entity name
- Claims requiring clearer documentation paths before pursuit

GCP Unclaimed Property Identification Services — Colorado

GCP supports Colorado agencies by:

- Performing structured research-only searches using city, utility, and historical entity names
 - Reviewing potential matches for relevance and validity
 - Delivering a clear Identification Report to support internal evaluation
 - Providing guidance on claim requirements and prioritization and GCP will do claim prep for \$25 per claim
-
