

THE GCP REVENUE HORIZON — LOUISIANA

Monthly Revenue Focus | Unclaimed Property Identification

Why This Matters Right Now

Louisiana agencies often manage layered funding environments shaped by utilities, ports, infrastructure programs, and disaster-era activity. These conditions increase the likelihood of unclaimed property accumulating unnoticed.

First Quarter of the Year identification provides clarity before audit and reporting cycles intensify. This process also gives insight into valuable internal control practices and policies.

What Finance Directors Are Seeing

- Potential unclaimed property tied to older infrastructure or emergency programs
- Vendor balances spanning multiple departments or funds
- Claims requiring historical context to validate ownership
- Limited internal capacity to research across systems

GCP Unclaimed Property Identification Services — Louisiana

GCP supports Louisiana agencies by:

- Conducting centralized research-only identification using all known agency and departmental names
- Reviewing and validating potential matches
- Delivering a structured Unclaimed Property Identification Report
- Providing guidance on documentation requirements and next steps

Claim preparation can be provided as well for \$25 per claim flat fee.
